SUMMARY

I am a results-driven Flutter Developer with hands-on experience in creating scalable, high-performance mobile applications. My proficiency in Dart, Firebase, and REST API integration, combined with a strong focus on clean architecture and UI/UX design, enables me to build applications that enhance user experiences while optimizing performance.

EXPERIENCE

Flutter Developer – APEX DREAM STUDIO

09/2025 – Present

- Engineered scalable cross-platform mobile applications using Flutter.
- Integrated Firebase services including Authentication, Firestore, and Push Notifications.
- Developed automated payout systems using Cashfree Payment APIs.
- Implemented secure payment workflows with webhook integration.
- Used Provider-based state management for cart, wishlist, and order processing.
- Designed responsive UI components with animations and pagination.

EDUCATION

- **Master of Computer Application**
Maharishi Markandeshwar University | 2023 – 2025
- **Bachelor of Computer Application**
Maharishi Markandeshwar University | 2019 – 2022

SKILLS

Flutter, Dart, Firebase, REST API, Kotlin, Git, GitHub, Android Studio, CSS

PROJECTS

Grocery Delivery App (Blinkit Style)

- Develop Complete Grocery deliver ecosystem including User App, Rider App, Shopkeeper App.
- Built rider app with order pickup, delivery tracking, OTP verification, and delivered order management
- Developed shopkeeper app for product management, order handling, and delivery coordination
- Integrated Firebase, REST APIs, push notifications, and real-time order tracking
- Implemented responsive UI, state management, and smooth workflow across all apps.

STRENGTHS

- Clean Architecture and Problem Solving
- Team Collaboration and Adaptability
